

## Tower clock systems

Since 1868, four generations of dedicated employees have been succeeding one another with the same passion for **time Measuring and Controlling**.

Whilst technology has evolved well beyond the imagination of the first generation, our commitment to the highest level of craftsmanship, innovation and performance will never alter.

Our activity these days are spread over five product ranges with Time as a common factor. Bodet are one of the leading manufacturers of Clock Systems, Displays Clocks, Scoreboards and Time and Attendance recording solutions.

Our customers world-wide appreciate the quality of our products which is now officially recognised by ISO 9001 certification.

We export to more than 60 countries through a network of 200 distributors, agents and OEM customers and 4 direct subsidiaries in Europe, Belgium, Spain, Switzerland and the U.K., with interests in several other companies.

We have established long term business relationships with our partners to ensure future trading excellence.

## TOWER CLOCK SYSTEMS

In the field of Tower Clocks and automatic bell ringing systems, Bodet are world leaders. We offer comprehensive solutions including Master Clock units, electric hammers, clock movements and customised dials.

## CLOCK SYSTEMS

Meeting our customer's expectations, Bodet has developed a wide range of digital and analogue clocks.

The recent integration of wireless and G.P.S. time synchronisation technologies, together with the use of encoded time protocol for driving a clock network, constantly ensures an accurate and reliable time display.

## SCOREBOARDS

As an essential instrument of communication between players and the audience, Bodet's scoreboards fit in with any kind of sport hall or outdoor sports facility.

The outdoor scoreboard series is available with an optional wireless remote control technology that allows keyboard use without constraining the user to one place.

## TIME & ATTENDANCE

Helping companies with the multiplicity of fixed or flexible working schedules and for replacing traditional punch clocks. Bodet has designed a range of computerised Time and Attendance recording systems for companies large or small.

In addition to employee attendance and absence registration, we also offer cost centering and access control management, as well as add-on software modules enabling a more productive staff management.

## DISPLAY SYSTEMS

The LED display technology ensures a perfect readability in any kind of environment for applications ranging from advertising panels and industrial displays to TV games shows and petrol price signage.
